Our models on the paper's Figure 16a

Original published graph retained | Our results added as thick lines with markers

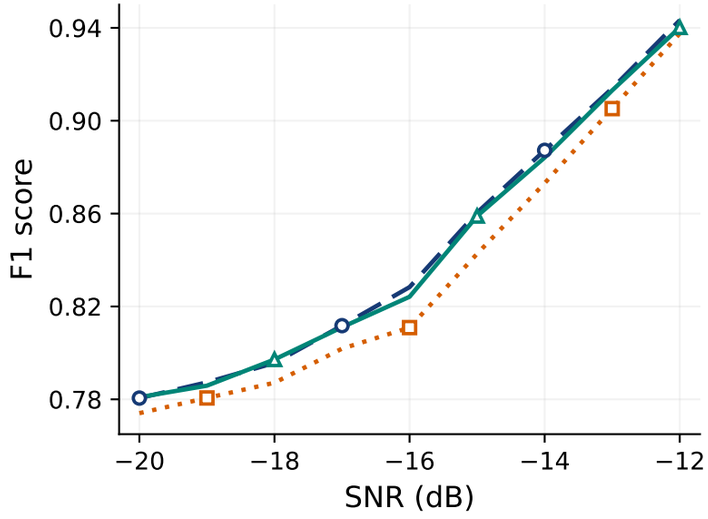

OUR RESULTS

- Original U-Net
- EvidenceAxialNet
- FastUNet
- FCNN recreation*

The original legend inside the graph identifies the paper's thin curves.

Low-SNR detail: our three models

Near-overlapping lines mean similar scores.
No values have been shifted or smoothed.

Source: Alammar & Lopez-Benitez (2023), Figure 16a, AWGN. DOI: 10.1016/j.phycom.2023.102113

Local results: mean per-image pixel F1. Training data and evaluation protocols differ from the paper.

* FCNN recreation is our earlier experiment on a separate test set; it is not the published paper curve.
